Office Action Summary

Application No.

09/926,029

Applicant(s)

HARAGUCHI, MANABU

Examiner

Scott Haugland

Art Unit

3654

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 and 8-10 is/are pending in the application.
- 4a) Of the above claim(s) 1-3 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 8-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 8/2/06 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over either of Watanabe (U.S. Pat. No. 4,684,272) in view of Thornton (U.S. Pat. No. 1,655,299) and Haraguchi et al (U.S. Pat. No. 5,819,500).

Watanabe discloses a roll of web comprising an elongated hollow wall defining a tubular shaft member 5 having concentrically spaced inside and outside surfaces,

rectangular notches 5a having a limited length from an end of the shaft member, each notch being defined by a recess disposed in the inner surface of the wall of the shaft member communicating with the end of the shaft member and extending to a radial depth short of the outside surface of the shaft member.

Thornton discloses a spool for web comprising an elongated hollow wall defining a tubular shaft member having concentrically spaced inside and outside surfaces, and at least four notches a2, b2 on the inner surface of the wall that receive projections on a drive spindle.

Watanabe does not disclose a paper roll comprising thermally fusible packaging paper wound on the tubular shaft member with a folded portion of the paper being disposed on an end of the shaft member.

Haraguchi et al discloses a thermally fusible packaging paper 20 wound in a double folded state on a tubular shaft 21 with a folded portion 20A of the paper disposed on an end of the shaft member. See Fig. 3.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Watanabe with at least four notches as taught by Thornton to reduce the minimum angle through which the spool must be rotated to align with the drive projections 16 and improve the convenience and efficiency of use. It would have been obvious to provide the spool of Watanabe with folded thermally fusible packaging paper on the tubular shaft member with a folded portion of the paper on an end of the shaft member as taught by Haraguchi et al to store and dispense such paper as needed for packaging.

It appears that the portion of the wall of the shaft member radially outside of the recesses of the notches would inherently be more flexible than the portions of the wall between the recesses since the shaft member of Watanabe appears to be formed entirely of the same material. In any case, it would have been obvious to form the shaft members from a single substantially uniform material for reasons of efficiency since there is nothing in the references to suggest the need to do otherwise.

Response to Arguments

Applicant's arguments filed 8/2/06 have been fully considered but they are not persuasive.

Applicant argues that none of the cited references suggests at least four rectangularly-shaped notches disposed continuously about a circumference of the inside surface of the shaft member. However, Watanabe discloses two rectangular notches and at least Thornton teaches increasing the number of notches to a number greater than four.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Haugland whose telephone number is (571) 272-6945. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathy Matecki can be reached on (571) 272-6951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
